**Ok All,**

**The dates I included are not correct. Here is the revised.**

**Warren:**

**If you are in town and working on 11/26, 11/28, 12/1, it would be nice if you could stop by the site. I plan to have 2 people onsite during these days pumping water (South to Middle to North to Sanitary Sewer). Leroy will be mobilizing to the site on 12/1 with full operations beginning on 12/2. I will be on phone duty (11/28 - 12/5) and will be available. I will be working with T&D Coordinator on other disposal issues. We work from 7 - 4:30 (Leroy, Frank are onsite at 6:30 am) Please call if you have questions.**

**See attached list of activities for the ERRS contractors. Obviously we will not complete those activities during the period of time you will be on-site. The main items while you are on-site are the following:**

**Disposal: STank5, VB607, VB641**

**Storm Water Management: Pump water from South Pond to Middle Pond to North Pond to Sanitary Sewer. If we get overwhelmed with water in the South and Middle Ponds, I have previously authorized the direct release to**

the storm sewer down Wayland Street in order to keep the water out of the residential areas to the south of the facility.

Once we finalize other items, I will send you an update.

Thanks

Gary Moore
